Subject: Superfund cleanup site, Willamette River

Looking at the cleanup plans for this disgraceful mess, I'm appalled at the response you have drafted. You have UNDER estimated the amount of cleanup needed to make the river safe for both people and animals.

Don't do a halfway job and then have to re-do when contaminants are found in animal tissues after you've "completed" the project. Please count me as an lifetime Oregonian, descended from pioneers, who thinks your plan is LAME.
